Education

2021

Bsc. Control and Instrumentation

Jomo Kenyatta University of Agriculture and Technology

Expertise

- UI/UX
- React
- Nodejs
- MongoDB
- MySQL
- Typescript
- GraphQL/REST api

Language

English

Swahili

German

Jerry Gathu

Full Stack Developer

From the moment I discovered web development I was hooked. I have spent the past year learning and building full stack apps with great UI designs using Javascript for both front and backend. My passion for coding is what drives me to commit to learning and progress as a developer. Below are some of the projects I have worked on.

Projects

○ 2022

<https://github.com/Gathu17/E-commerce-server>

E-commerce web app

- A Nodejs application with React in the frontend that simulates an online clothing shop.
- The web app queries data from a MongoDB server using the GraphQL API.
- The front end was styled with styled components and semantic UI framework.
- The server was hosted on heroku and the client-side on Netlify.

○ 2022

<https://github.com/Gathu17/Social-server>

Social Media web app

- A react application with Nodejs in the backend where users can register, login and post comments.
- This web app also utilises GraphQL to query data from the server on MongoDB.
- The app was hosted on Netlify and Heroku.

○ 2022

<https://github.com/Gathu17/Api-s>

Game App

- A simple gaming web app with age guessing, dictionary and country data.
- The app is built using HTML, CSS and vanilla Javascript to manipulate the DOM.
- It fetches the data from multiple APIs using Javascript.

Work Experience

August 2022 - Present

Upwork/Fiverr

Freelancer

- I build web apps in both client-side and server-side applications with Javascript and both NoSQL and SQL databases..
- I fix bugs from web designs to deployment.
